A Junior Software Developer with a background in Nursing and experience in Video Editing. Looking for a career change to use my coding, creativity, and problem-solving skills daily. Experienced in HTML, CSS, JavaScript, React, REST API, Node.js and Express, PostgreSQL, Prisma and Git Control. Open and willing to learn and pick up new technology. I am seeking a job as a Junior Web Developer to become a better coder and make a positive impact in the tech industry.

SOFTWARE DEVELOPMENT EDUCATION & EXPERIENCE

Software Development, Boolean UK   February 2022 – August 2022

An intensive 6-month full-stack software development bootcamp. I became proficient in HTML, CSS, JS, React, Jasmine, TDD, Node.js and Express, PostgreSQL, Prisma and Insomnia.

This bootcamp included a 4-week Team Development project working on existing codebase, adding new features to the website based on Kanban and practising git control. It also included building two personal projects from scratch, one being a front-end app and the other a full-stack app.

PROJECTS

Where Next   **Frontend** and **Backend**

Where Next is my 2 weeks final full-stack project where the user can connect with other people to ask questions about living costs and life in different cities in the UK.

- Technology used: HTML, CSS, React, Node.js, Express, PostgreSQL, Prisma, Insomnia.
- Used bcrypt and JWT for authentication
- UI navigation implemented using React Router and useNavigate
- Created a local API to store the list of people

Search Job   **GitHub**

Search Job is an app that allows the user to find jobs as a Software Developer

- Technology used: HTML, CSS, React and JS.
- Includes a filtering in the search bar
- Mobile responsive
- UI navigation implemented using React Router
- Created a local API using JSON

To-Do-List   **GitHub**

This is a To-Do-List I created using HTML, CSS, and JavaScript only. The aim is to keep learning coding even after completing my bootcamp.

The projects are not yet deployed but you can see my code and an image overview on GitHub.
